github.com/mollycarroll

Software engineer with 3+ years of experience in full stack development. GCP-certified with strong experience in cloud infrastructure, observability and shipping production-grade full stack applications.

Skills

- Languages: Python, Java, JavaScript, TypeScript
- Frameworks & Libraries: FastAPI, React.js, Node.js, Spring (Boot, MVC), LangChain
- Cloud & DevOps: Google Cloud Platform (Associate Cloud Engineer), Docker, Kubernetes, Rancher, GitHub Actions
- Data, AI & Observability: Claude Code, Elasticsearch, Dynatrace, Datadog

Work Experience

Software Developer | Greenstand | St. Louis, MO | Sept 2026–present

- Full stack development and cloud infrastructure management as part of a remote team of volunteers for global nonprofit's Treetracker suite of applications. *Tech: JavaScript/TypeScript, Node.js, Kubernetes*

Software Developer | Thoughtworks| Denver, CO | Aug 2021–July 2024

- **Demo AI copilot for HR**: Led a team of 3 developers and a designer to build and demo an AI copilot for internal HR use and client presentations; positive reception drove continued internal demand for the concept. *Tech: Python, LangChain, AI21 Jamba Instruct LLM, React*
- **Enterprise search → RAG conversion**: Advised a Tech Ops team as technical advisor across sprints migrating enterprise search to a Retrieval-Augmented Generation architecture on GCP Vertex AI and Gemini.
- **Technical trainer, TW AI PromptCamp**: Facilitated and presented GenAI sessions (topics such as LangChain and RAG context windows) as part of the Solution Design track, training colleagues across the practice.
- **Site reliability engineering (grocery retailer client)**: Designed and implemented observability dashboards and monitoring that enabled a new SRE team to independently support a nationwide grocery order fulfillment feature rollout. *Tech: Dynatrace, Datadog, Elasticsearch, Kibana, shell scripting*
- **Employee leave planner application**: Served as subject matter expert transitioning the application to maintenance-only support as a certified GCP Associate Cloud Engineer; developed features, led spikes and documentation work. *Tech: Java, Spring, GCP*
- **Backend legacy microservices (grocery retailer client)**: Developed feature and epic implementations across roughly 25 legacy microservices supporting grocery order fulfillment — including a same day order modification feature — while sustaining 30–50 tickets and 7–10 releases per month; facilitated architecture/planning sessions with the client. *Tech: Java, Spring, GitHub Actions, Kubernetes*
- **Web-based utility app + in-person rollouts (grocery retailer client)**: Developed for a web-based utility app used in production support, designed CI/CD deployment pipelines and led on-site software rollouts to ~150 stores across 9 cities nationwide, working directly with client stakeholders to ensure smooth transitions to the new system. *Tech: JavaScript, Node.js, React, TypeScript, Kubernetes*

Digital Advertising Technical Specialist | Accenture | Denver, CO | 2019-2020

- Built JavaScript-based technical solutions for a global sales team supporting ad customers' social media pixel and analytics setup, including optimized implementations for major e-commerce platforms (Shopify, BigCommerce, WordPress).

Projects

- **GigFinder - Venue Discovery App for Musicians (2026)** - https://mollycarroll.github.io/gig-finder

  Full stack web app that lets musicians search venues by location for gig opportunities, with user authentication and the ability to save venues to a personal account for follow up. Scrapes venue websites for booking and contact information to show per listing in search results. *Tech: Python, FastAPI, Supabase, React, TypeScript, Claude Code*

- **Icarus - AI Chatbot Resume (2026)** - https://icarus-xrhw.onrender.com

  Retrieval Augmented Generation chatbot that answers questions as an AI resume representative, using Hugging Face's inference API for calculating embeddings and performing inference when queried. Features a Supabase (PostgreSQL) vector database used for contextual retrieval. *Tech: Python, FastAPI, LangChain, Hugging Face, Supabase*

Education and Certifications

- **Certification, Associate Cloud Engineer,** Google Cloud Platform **2024**
- **Certificate, Software Engineering,** General Assembly **2021**
- **Dual BA, English / International Studies,** Saint Louis University **2011-2015**
